ED Demand Analysis	3
PET Analysis	22
Trolleys and Surge Analysis	28
Delayed Transfer Of Care Analysis	38

The following describes the calculations used to determine change versus previous years:

- If a KPI value is measured as a whole number, the percentage change in comparison to previous years is based on relative calculations.  
i.e. for example, change in attendance w.r.t 2023 will be calculated as:  
 $(\text{Attendance (2024)} - \text{Attendance(2023)}) / (\text{Attendance (2023)})$
- If a KPI value is measured as a percentage, the percentage change in comparison to previous years is based on absolute calculations.  
i.e. for example, change in 24hr PET w.r.t 2023 will be calculated as  
 $24\text{hr PET \% (2024)} - 24\text{hr PET \% (2023)}$

**Please note 8am Trolley Total has been revised for years 2022/2023 to include additional ward trolleys.**
